TEXAS [REDACTED]  
DOCUMENT

This is one of a series of technical papers, which cover a variety of topics. For information concerning other technical papers in this series, or to order more copies of this paper, contact:

Elizabeth Christian Wilds  
RPC, Inc.  
1705 Guadalupe  
Austin, Texas 78701

This paper was prepared under contract with the General Land Office of Texas, Coastal Management Program. The report was partially funded through financial assistance provided by the Coastal Zone Management Act of 1972, administered by the Office of Coastal Zone Management, U.S. Department of Commerce.

## FOREWORD

This technical paper is one of a series of seven papers in which the background material, models, and data used to develop the social and economic component (SEC) of the activity assessment routine (AAR) are discussed. Together, the papers are reference sources for the SEC user's manual and form a basis for further system development.

Staff members of the Environmental Management Division, Texas General Land Office, in Austin are available to assist interested parties in learning to use the system, and they welcome any questions, comments, and suggestions concerning the SEC.

Many individuals assisted in the production of the technical papers. The principal-in-charge was Ron Luke. Project managers were Dennis Cooper and Ann Orzech. The primary developers of the social and economic impact assessment methodologies were James Kimmel and Robert Kieschnick, respectively. Other researchers were Carolyn Honea, Cassandra Evans Woods, Bob Anderson, and Marta Braitermen. The technical editor was Nancy Grona. Production assistance was provided by Lori Snyder, Kim Frazier, and Joanne Click.

  
Bob Armstrong, Commissioner  
General Land Office of Texas

## TABLE OF CONTENTS

	<u>Page</u>
Group I: Data Sources . . . . .	1
Group II: Economic Modelling Literature . . . . .	5
Group III: Input/Output Literature . . . . .	11
Group IV: Social and Economic Impact Assessment Literature . . . . .	15
